How to Change Your Patient's Lives and Grow Your Practice Through Treatment of Snoring and Sleep Apnea

Presentation Synopsis:

67% of the patient's in your practice have a snoring problem and it is now estimated that 17% of the patients have obstructive sleep apnea (OSA). Snoring and OSA can have a significant effect on marriages, relationships, and a patient's overall health. Dentists can play an important role in identifying and treating snoring and OSA. This entertaining and informative presentation will provide you with a clear understanding of all aspects of snoring and OSA and a step-by-step approach to identifying, evaluating and

coordinating treatment for your patients. It will also be an exceptional guide to treating snoring and OSA with oral appliance therapy. You will learn the features and characteristics of 10 different oral appliances as well as the benefits and potential side effects of these devices. This program will give you the practical clinical information you need to immediately incorporate dental sleep medicine into your practice. The practice of dental sleep medicine can change patient's lives and re-energize your professional life.

Objectives:

At the conclusion of this course the participants will:

- Understand the pathophysiology of snoring and OSA
- Be able to identify the signs, symptoms, and health risks of OSA
- Know about medical evaluation, diagnostic testing, and treatment
- Have an understanding about the surgical and non-surgical treatment options for snoring and OSA
- Know the protocol for use of oral appliances and many of the appliances currently in use
- Understand the possible complications and side effects and how to manage them
- Know how to market and grow your dental sleep medicine practice

JONATHON A. PARKER, DDS

Dr. Jonathon Parker is a graduate of the University of Minnesota School of Dentistry. From 1983-2000, Dr. Parker provided care in a practice focused on management of TMD and orofacial pain. In 1992, he expanded the practice to include treatment of snoring and obstructive sleep apnea. Since 2001, he has had a full-time practice in dental sleep medicine.

Dr. Parker is a part-time faculty member at the University of Minnesota School of Dentistry. He is a Diplomate of the American Board of Dental Sleep Medicine and American Board of Orofacial Pain. He is a charter member of the American Academy of Dental Sleep Medicine. He was the recipient of the Academy's prestigious Distinguished Service Award in 2003.

Dr. Parker is on the staff or a consultant to six different sleep disorders centers in the Minneapolis-St. Paul area. Dr. Parker has lectured throughout the United States on the role of the dentist in the evaluation and treatment of snoring and sleep apnea using oral appliance therapy. He has authored a number of research articles and abstracts evaluating the effectiveness of oral appliances used for treatment of snoring and obstructive sleep apnea.
